MEMORANDUM FOR: Chief, Geography Division, ORR

THROUGH: Chief, Geographic Research, ORR

THROUGH: Chief, Economic Research, ORR

THROUGH: Acting Chief, Industrial Division, ORR

FROM: Acting Chief, Guided Missiles Branch, D/I

SUBJECT: Updating Request for D/GG Support in the
Guided Missile Field

REFERENCES: a) I/GM memorandum dated 7 January 1960
b) Discussion [REDACTED]

25X1A9a

1. This memorandum is an outgrowth of our recent discussion concerning the need for updating I/GM's request for support as presented in the referenced memorandum. Developments in the guided missile field since the initiation date of the referenced memorandum indicate the need for a flexible ad hoc type of support which will permit cooperation between D/GG and I/GM on various areas and subjects as the need arises. Recent support provided I/GM on China and Bulgaria evidenced such a need.

2. East Germany continues to be the European Satellite of priority interest for the deployment of surface-to-air missiles (SAM) and for the possible deployment of surface-to-surface missiles with a range up to 1700 n.m. The positive identification of SAM sites in Albania and Bulgaria has indicated a need for a review of and closer scrutiny of reported missile activity in the other European Satellites and in Communist China.

3. There is a need for overlays plotting missile order of battle in Soviet Bloc countries. Graphical presentation of the following type of information is desired. Reported surface-to-surface missile deployment with emphasis on missiles with a range of 700 or more n.m. and reported SAM activity.

SUBJECT: Updating Request for D/GS Support in the Guided
Missile Field

- a. Launch Sites
 - b. Support Facilities
 - c. Storage
 - d. Transport
 - e. Radars - (missile associated)
 - f. Order of Battle (plot those units which are
suspect of possible missile
association)
 - g. Highly secure areas suspect of possible
missile association
4. It is requested that ad hoc support be given to I/GM as the
need arises. First priority should be given to plotting reported
missile activity (in the European Satellites and Communist China)
which may indicate the possible deployment of missiles with a range
of 700 or more n.m.
